...and this is Sound Business for You

Let's look at this depression problem in the light of good old fashioned horse sense. The present condition was caused by an unfortunate combination of circumstances. If everybody will tend to his own knitting, proper effort will effect the cure quickly. Already many lines of business show an up trend. People as a whole are beginning to see the silver lining. Folks are coming out into the sunlight of confidence—living more normally. And that is the answer.

You can speed Prosperity's return by purchasing home products—by buying normally what you need—spending judiciously and keeping our payrolls active. The process is simple. The money you spend doesn't have so far to travel—it stays right here in

Southern California where it will come back to you much faster. Let your neighbor earn money that he can spend with you. It's just plain horse sense—especially when you can get more for your money here, anyway.

This is your responsibility. It is the individual responsibility of every man and woman in Southern California.

"hello London California speaking."

In 1/30 of a second, your voice flashes across continent and ocean. Another modern miracle!

Astounding, too, are these communication facts: This state has more than 6,150,000 miles of transmission lines—in addition to ever-expanding radio facilities. And Californians transmit approximately 7 million telephone calls, telegrams and commercial radio messages daily.

Communication companies in California have invested \$413,000,000 and employ some 40,500 workers.

Of these employees, more than 10,000 are Bank of America depositors. And this Bank is privileged to serve the leading telephone, telegraph and commercial radio companies operating in California.

With their far-flung organizations, these companies require exceptional statewide banking facilities. Conservatively managed and charged with great responsibility to government and public, they choose their banking connections with extreme care.

Especially significant, therefore, is the selection of Bank of America by these leaders in public service—and by so many thousands of their employees. Do not these facts suggest the most desirable bank for you?
